Velocity IoT Quick Start Guide

Step 1

Create your Velocity IoT account, go to www.velocityiot.net

Step 2

Activate your SIMs. Enter your 18 digit ICCID, select your ONeRATE pool group and select your plan.

ICCID

Step 3 (Device setup)

Make sure to set the following items for connectivity on your Device or module:
- Use the APN: **flolive.net**
- Enable **Roaming**
- Set the module to **data centric**

Since these are multi-carrier SIMs it is best not to limit the Cellular Module Bands

Step 4

Insert the SIM card in your device and get started!

Support

For support contact support@velocityiot.io or post a ticket on our support desk

Additional SIMs may be ordered through Velocity in bulk via purchase order or with our distribution partner Digi-Key : Velocity on ww.digikey.com
